FOREWORD

One of the most successful programmes of the International Centre of Insect Physiology and Ecology (ICIPE) is the African Regional Postgraduate Programme in Insect Science (ARPPIS). In conjunction with a number of African Universities, this programme has been training African scholars for PhD and MSc degrees since 1983. The total number of graduates of this programme, by the end of 2000 was more than 140. Most of these scholars have returned to their home countries, and are working in a spectrum of institutions including Universities, National and International Research Organisations, the United Nations, the private sector and in NGOs, both on the African continent and abroad.

The ARPPIS Scholars Association (ASA) was created in 1998 as a forum for the scholars, through which to exchange information, establish collaboration in their work and to maintain a relationship with ICIPE. We are happy to present this first edition of the *Directory of ARPPIS Scholars Association*. The Directory gives relevant data of the scholars in one publication that can be utilised for collaboration and information exchange. It will be available not only to the scholars themselves but also to other individuals and institutions interested in the development of the African continent, the target constituency of the ARPPIS programme in particular, and ICIPE.
